Environnement

Contenu

Virgin pulp fibres (100%)
Chemicals

Matériel

Virgin pulp (TCF)
Virgin pulp fibres (chemical pulp) are produced out of softwood or hardwood. The process is either sulphite or sulphate delignification, meaning that e.g. lignins and resins are removed from cellulosic material. The bleaching will be done without usage of chlorine or chlorine derivates (TCF means Total Chlorine Free).

Chemicals
All used chemicals comply with legal regulations.
If coloured" we use common used direct paper colours complying with legal regulations.
If printed" we use common used flexographic water based printing colours complying with legal regulations.

Production

This product is produced at Ortmann mill, Austria, and certified according to ISO 9001:2000 and EMAS.

Destruction

Napkins are suitable in normal waste handling systems by the community.
Used products should not be handled over to recycling systems.
